
ChatGPT Health is the future of care.

I'm building the 'Safety Rails' to
make it a reality for India.

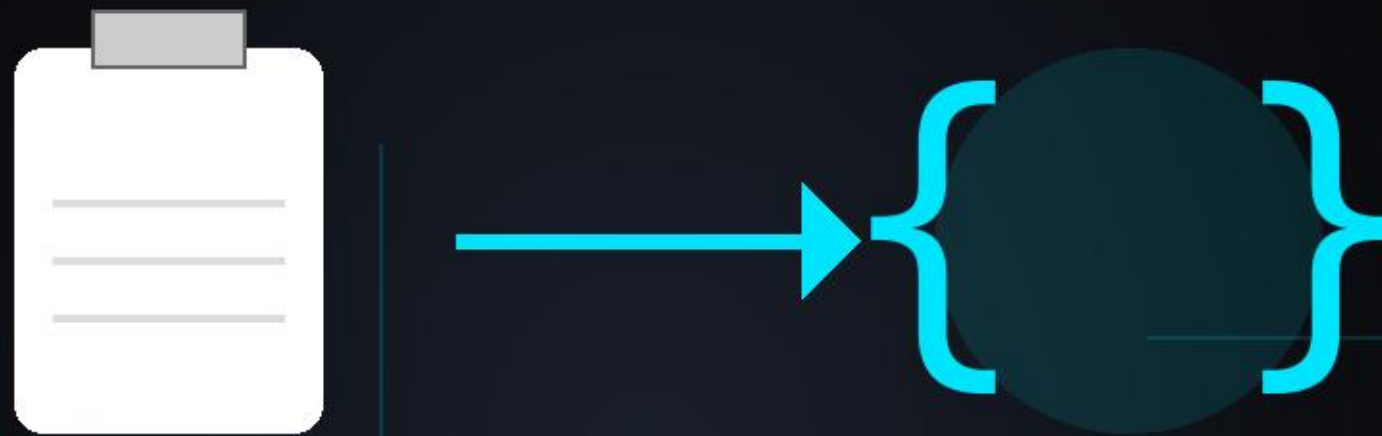

Managing the "Ghost Data" Liability.

In my years in Healthcare Ops, I saw the truth:
"Deleting" a record usually just means
hiding the row in a messy Excel sheet.

**In 2026, that "Soft Delete" is a
₹250 Cr Penalty under the DPDP Act.**

From the Hospital Floor to the Code Terminal.

I moved from managing clinical workflows to
architecting the governance code they need.

Domain Expertise □ **Technical Execution.**

SMART INGRESS: Standardizing the Chaos.

Input:

'Pt_Nme'

FHIR:

'Patient.name'

Validated against NRCeS 2026 Schema.

Omnilingest auto-maps clinical inputs to global FHIR R5 standards at the point of entry.

THE KILL SWITCH: Rule 8.3 Erasure.

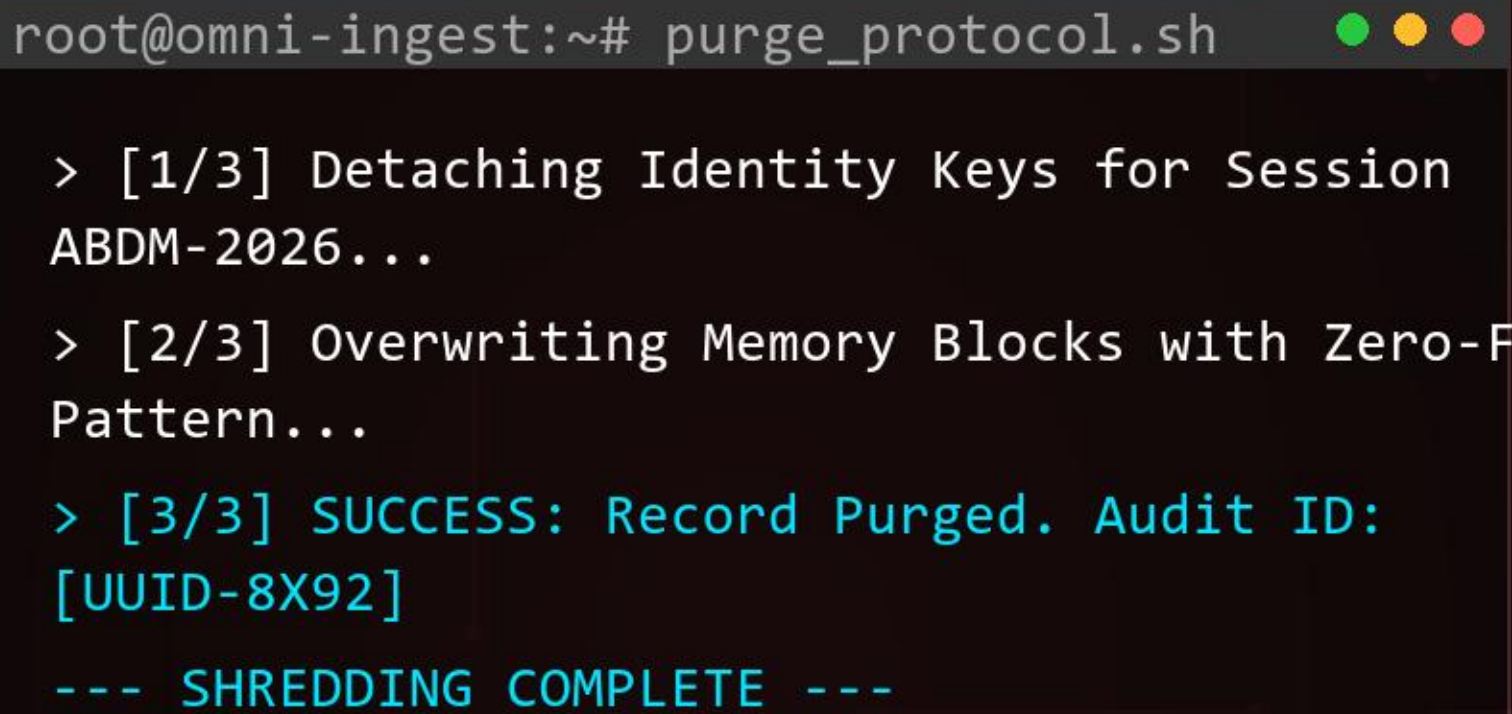

SHRED ON REVOCATION

In 2026, "Delete" is a technical mandate.
I've engineered a real-time Kill Switch
that shreds PII immediately.

Cryptographic Shredding in Action.

```
root@omni-ingest:~# purge_protocol.sh
```

```
> [1/3] Detaching Identity Keys for Session  
ABDM-2026...  
> [2/3] Overwriting Memory Blocks with Zero-Fill  
Pattern...  
> [3/3] SUCCESS: Record Purged. Audit ID:  
[UUID-8X92]  
--- SHREDDING COMPLETE ---
```

Real-time deep purge ensures zero-recovery,
meeting 2026 statutory standards.

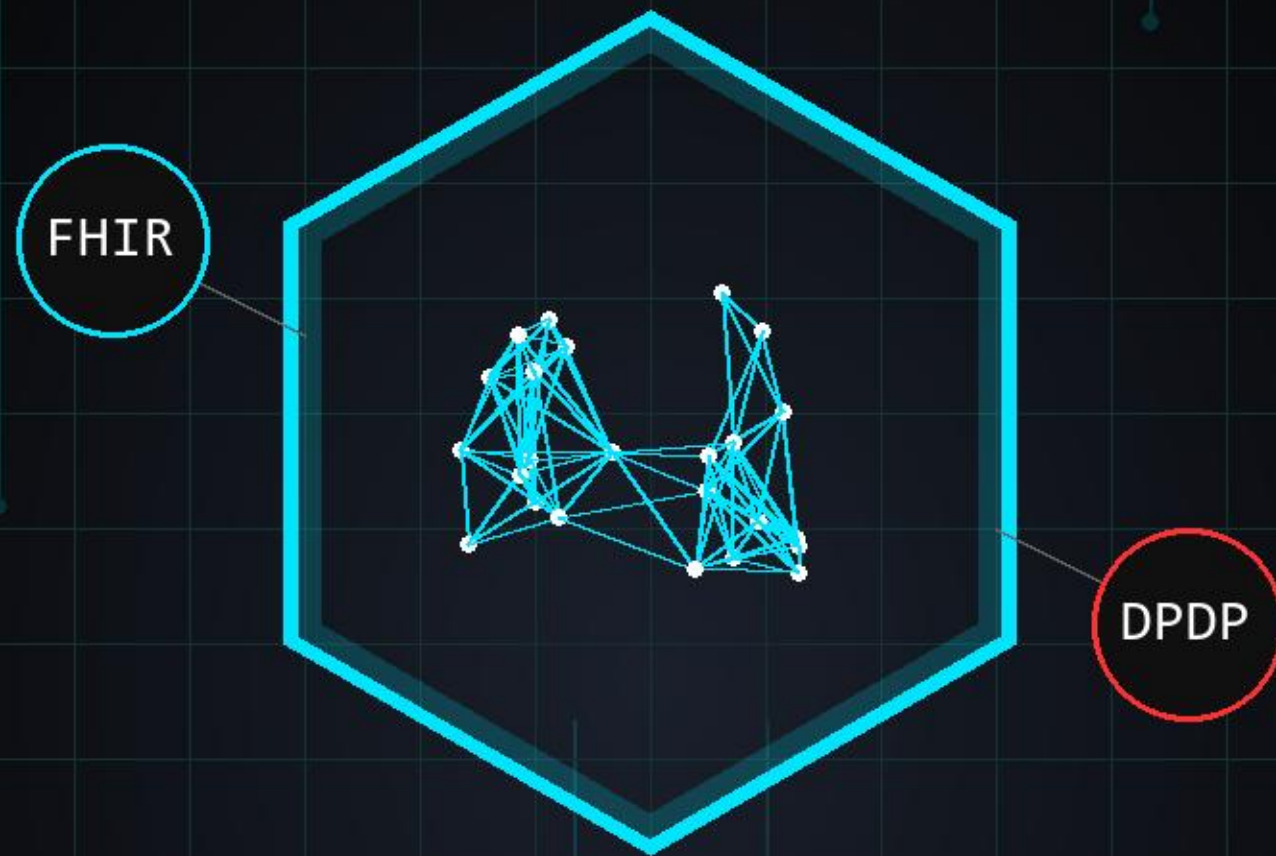

PROOF FOR THE REGULATOR: Statutory Audit.

Timestamp	Event_ID	Action	Retention_Expiry
2026-01-14	239042c173...	REVOKED_RULE_8.3	2027-01-15
2026-01-14	22b518c439...	REVOKED_RULE_8.3	2027-01-15
2026-01-14	221456b8fd...	REVOKED_RULE_8.3	2027-01-15

DPDP RULE 8.3
AUDIT VERIFIED

PII is purged, but the action is preserved in an immutable 1-year audit trail for legal defense.

TRUST IS THE ULTIMATE FEATURE.

Standardized data + Absolute erasure = Governed AI.
We make diagnostic tools safe for
real-world clinical use.

Bridging the AI-Governance Gap.

PHASE 0.1 IS THE FOUNDATION.

Phase 0.1: Ingress & Erasure

Phase 0.2: ABDM Sandbox M1-M3

Phase 0.3: AI Metadata Governance

We've architected the safety rails.
Next, we connect to the national health gateway.

Built for the ABDM Sandbox Roadmap.

LET'S BUILD A SAFER HEALTH-TECH FUTURE.
